5. It has been decided that the available tube types are not suitable for use in the planned VHF receiver. New types (6 AK 5 and 6 CB 6) are being developed which will work down to 1 meter. The set must wait for the completion of these tubes.

## 6. Personalities

- a. Fomenko, formerly Russian head of SAG Kabel, was, in mid-June, placed in charge of all Russian property in Germany. He now occupies an office at the SAG headquarters in Berlin-Weissensee.
- b. Mataishenko, formerly head of AT (Elektro-Apparate-Werke) Treptow, was appointed to succeed Fomenko as head of SAG Kabel. A German has been given overall command of AT Treptow, although there is still a Russian chief engineer there. This is the first Soviet-owned factory to be placed under the control of a German.

50X1-HUM

c. Glybin, Russian head of the Work für Fernmeldewesen HF, returned from six weeks leave in the USSR on 25 July 1951.

8. There is considerable friction between the three directors Müller, Dr. Eckhardt, and Dr. Lorenz. Dr. Eckhardt is believed to have given an ultimatum in late July that he would leave if Director Müller were not removed from his post within a month. Stösser, head of the tube factory, has given notice after a dispute with Korotov, the Russian chief engineer. Glybin has accepted his resignation.

	dispute with Korotov, the Russian chief engineer. Clybin has accepted his resignation.
